

ENABLING A SAFE FLIGHT

Company Profile

At Blues Skies Aviation, we believe that powered flight has transformed – and will continue to transform – the world. It’s an engine for human progress and an instrument to rise above.

That’s why we work with an explorer’s heart and a perfectionist’s grit to share our experiences and knowledge to keep your aircraft airworthy at all the time. We do this as a way of turning possibilities into realities for our customers.

This is our objective, and a challenge to which we rise every day. It’s about more than transporting people reliably to their destinations. It’s about more than providing the care and intelligence to service aircraft expertly. It’s about innovating and engineering a new and exciting future for aviation – one in which the full potential of human progress can be unleashed.

This is how we at Blue Skies Aviation approach our work, and this is why we are inspired to go beyond.

We are Blue Skies Aviation. We enable a safe flight.

WELCOME ONBOARD

ABOUT US

Designed to eliminate outdated tech and replace outdated thinking, we are structured into different clusters: Aircraft Acquisition Support, Aircraft Parts Provisioning, MRO Services, Aviation Training & Development, Aviation Quality & Safety and Defence Project Management.

As the nerve centers of Blue Skies Aviation, our clusters bring talent and technology together as never before. Collaborative from the outset, we foster relationships across industry to create fresh innovations by bringing technology to both commercial and military aviation. Focused on the future, we are open to partnership and open for business.

OUR

ORGANIZATION

Our mission is simple; to bring products and services to market with innovation, greater speed and efficiency.

At Blue Skies Aviation, we sell undisruptive products, end-to-end services and trailblazing solutions that help to keep your aircraft airworthy, lower costs and simplify business.

Anticipating the risk scenarios of tomorrow, we focus on bringing together commercial innovations with precision solutions. Our goal is to be proactive and future focused - not simply accelerating in one space, but creating value that has tangible benefits for everyone.

OUR PURPOSE

The available solutions in aviation industry has become outdated, cumbersome and driven by an obsolete world view. Blue Skies Aviation is the much-needed course correction, prioritising technology and people. Our perspective is non-binary. We give our customers, unconventional solutions to face the challenging operational issues in ever changing aviation industry and success in competitive business whilst ensuring the safety and security.

We shape the foundations of our vision by collaborating with the industry's most talented thought leaders, risk-takers, and innovators. Seeking solutions everywhere, our domains and partnerships know no bounds: big or small, start-up or established, local or global. We are agile where others are inflexible.

As firm believers in open architecture, we don't lock our clients down with inflexible, dead-end black boxes.

OUR DIFFERENCE

We are a team of experienced aviation professionals who are passionately committed and dedicated to your aviation safety. Strategically based in Sri Lanka, Blue Skies Aviation has assembled a globally diverse, cross-functional team of aviation industry experts. These accomplished individuals have established track records of success in aviation safety and have proven, results-oriented experience from aviation organizations throughout the world.

Our team fully understand the multiple aviation challenges facing you and the industry on a daily basis. Blue Skies Aviation subject matter experts take tremendous pride in sharing their real-world experiences and long-standing knowledge of aviation in order to ensure an effective strategic skill transfer to those aviation organizations and individuals whom we have the distinct pleasure of serving.

Whether your specific needs are centered upon aircraft operation, aircraft maintenance, aviation safety, aviation auditing, aviation training, aviation consulting services, or other aviation related challenges, your Blue Skies Aviation Team can be relied upon to meet your scheduling requirements. In addition, we are fully committed to being responsive to your specific aviation safety and business needs, while truly empowering your management and staff personnel to meet their full performance potential.

OUR TEAM

OUR SERVICES

Blue Skies Aviation, specialized in acquisition of aircraft (both fixed wing and rotor wing) for civil aviation and military aviation with the intent of providing comprehensive, detail-oriented service to our clients.

Here at Blue Skies Aviation, we know that our clients' needs and concerns begin well before and extend long after the purchase of an aircraft, and we are prepared to assist them at every step of the acquisition process. Just as an architectural firm assists its clients with careful, thoughtful design and implementation of projects, Blue Skies Aviation builds solid deals, step by step, so that no hidden issues or problems arise. Whether you are considering purchasing a first aircraft, adding to an existing fleet, selling or trading, our firm will find the best solution for you by maximizing value and minimizing risk and expense.

Portfolio of our Services include:

- Acquisition Support on Aircraft Purchasing (New or Used)
- Acquisition Support on Aircraft Leasing (ACMI or Dry)
- Charter Flights (Passenger, Cargo and Aerial Work Flights)
- Air Field Support Services (Handling and Refueling)
- Feasibility Studies prior to Aircraft Acquisition (Civil and Military Aircraft)
- Acquisition Support on UAV Platforms
